

CONDITIONAL ACCESS: NAS

SAVE MONEY WITH SIMPLE, FLEXIBLE HEADEND MANAGEMENT SERVICES

Comcast Technology Solutions removes complexity and capital costs from your digital video management architecture, so you can focus on delivering extraordinary experiences to your audience. Our National Authorization Service (NAS) Conditional Access (CA) services provide a flexible, economical solution to implement new digital technologies quickly. NAS allows you to receive, process, control, and distribute digital video, audio, and data services without a local access control system.

HEADEND MANAGEMENT SERVICES

- Headend device management
- STB authorization
- STB application delivery
- Guide data distribution
- 24x7 technical support

NAS SUPPORTED SERVICES

- Customized code download
- VOD
- uDTA service-tier encryption
- TiVo guides including:
 - R32 new EPG & multi-room-DVR support
 - TiVo DTA guide
 - Emergency Alert System (EAS)
 - Multiple billing and backend systems

HOW NAS BENEFITS YOU:

- Simple and economical digital video management and support for ARRIS headends
- Supports widely-used SD and HD set-top boxes (STBs) and DTAs from ARRIS, Pace, Technicolor, Evolution, and CableCARD compatible devices (e.g., TiVo)
- Flexibility to implement new technologies such as an all-digital conversion and video on demand (VOD) with limited upgrade costs
- Service tier encryption for uDTAs, providing systems with the option to set up DTAs with tiers within their billing environment, a low-cost solution for an all-digital system
- Reduced capital investment in equipment necessary to manage a digital system, including CA systems, guide distribution servers, centralized CASMR and application carousels
- 24x7 support through Comcast National Video Operations Center
- Access to NAS Headend Management Report in the Managed Satellite Distribution Self-Service Portal
