

# CLOUD COMMUNICATIONS PLATFORM

DELIVER NEXT-GEN VOICE SERVICES WITHOUT THE BURDENSOME COSTS OF DEPLOYING, MAINTAINING, AND EXPANDING YOUR OWN NETWORK.

Modern voice services can be prohibitively expensive to deploy at scale but are an attractive way to cultivate longer, more profitable relationships with both business and residential consumers alike. Comcast Technology Solutions offers a comprehensive set of world-class voice-over-IP (VoIP) solutions that transform the traditional delivery method for operators. Through a compelling portfolio of capabilities and services that can be tailored to fit your unique customer needs, Comcast Technology Solutions provides innovation and a better business model.

Built on Comcast's best-in-class, carrier-grade, cloud-based platform, we offer flexibility, agility, and a wide-ranging set of options for all service provider levels. Our API-driven automation and flow-through provisioning provide deep functionality and rock-solid dependability, all managed by Comcast Technology Solutions, so you can focus on your customers and your growth objectives.

## SEAMLESS VOIP TRANSFORMATION

Voice service remains an essential element of an MSO's product portfolio. Comcast's strength in ownership and control of the end-to-end ecosystem results in a service that continuously innovates to meet the evolving needs of today's service providers. Our three-pronged approach is designed for customization; making it a turnkey solution that improves customer satisfaction and your bottom line.

### Voice platform

Service provider control of product definition, marketing, and experience
